Touch Accuracy	3.3mm
Storage Temperature	-20°C to 70°C
Operating Temperature	0°C to 55°C
Dimensions	19.5mm x 8.1mm

Q&A

What is the correct Touch Frame size for my monitor? The easiest way to order your Touch Frame is to determine your TV's diagonal screen size (32", 50", etc.).The same size Touch Frame would be ordered.

To confirm compatibility, please include your TV Make & Model number in the notes section on the checkout page. We will confirm compatibility prior to proceeding with your order.

Are custom multitouch screens available? YES. More than 50% of our custom orders are for uniquely sized and shaped Touch Screens. Please consult with an SSI representative regarding the details of your project.

How are Touch Frames installed? Touch Frames are easy to install. Simply apply provided double-sided tape to Touch Frame - velcro can also be used if desired.

Are Touch Frames waterproof? Yes, we do offer waterproof products. Please specify waterproofing when placing an order. Without this information, your order will be produced as a standard, non-waterproofed product.

What is the lead-time for a Touch Frame? The typical Touch Frame order ships within 5-7 days from date of order. Lead-time may vary depending on requested size.
